

## End Tower Monitor (Z5-ET)

Z5-ET is the next generation of end tower units. The easy to install and use system helps to upgrade even the most basic pivot with smart monitoring features. The Z5-ET is compatible with any pivot on the market today. With the easy to use phone app and web portal pivot monitoring has never this simple.

## Product information

The End Tower Monitor is the first universal remote telemetry unit truly designed to handle multiple aspects of your farming business. Acting like a 24/7 dedicated watchmen, the Z5-ET constantly monitors your operation to keep you informed on what's going on.

Combined with our modern web portal, you can configure your operation to meet your needs. The Fieldwise Portal gives you full access to your operation, including pivot monitors, probes and other equipment, all in a single app.

Choosing is simple, just like Fieldwise. We offer cutting edge technology at an affordable price, along with superior service.

*The smarter way to control every drop!*
