Irrismart Eressure 'ET05' series of pressure transmitters are a low cost, compact and rugged device that are ideal for simple installation in harsh environments. The IE+, rated, stainless steel housing and E: cable is ideal for industrial and agricultural environments where outdoor installations are required. These sensors also feature high quality pressure sensing elements which provide long term hassle free operation.

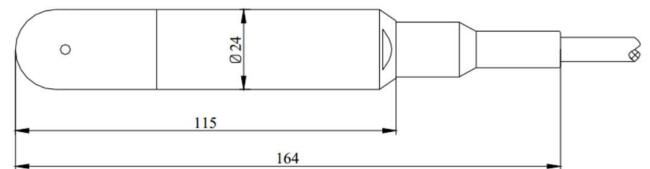

Level e

This durable transducer is ideal for tank monitoring and shallow well measurement, yet rugged enough for long term deployment in a wide range of applications.

As standard the sensor is 0-5v output, making it versatile enough for low powered remote monitoring, process and irrigation applications with decoder systems.

- Silicon Sensor
- Heavy-Duty Stainless-Steel Construction
- IP68 Rated
- Compact Form Factor
- Reinforced Vented Cable
- Easy to Install

The smarter way to control every drop!
